

An eye on the future. Solutions for today.

The KampData Tax Engine 1.1 Now Available!

Do you need

- addressing by ZIP Code
- tax schedule assignment
- calculation of sales or use tax outside of Microsoft Dynamics GP?

Then *you* need the **KampData Tax Engine**.

The **KampData Tax Engine™** is a plug in product that brings sales tax related features to other applications. The **KampData Tax Engine** is a .NET DLL written in C# that presents an Application Programming Interface (API) which allows its features to be utilized inside other .NET and/or COM enabled applications.

[Download The KampData Tax Engine 1.1 for Microsoft Dynamics GP 8.0 and later](#)

This release addresses the following issues:

- The [Document\(\)](#) method was modified to eliminate record contention errors when creating new Tax Documents by utilizing Optimistic Concurrency when fetching the next Master Number.
- The [NextDocumentNumber\(\)](#) method was added with the **KampData Tax Engine** version 1.1.
- When Microsoft released .NET 2.0, the process used to generate and validate Tax Engine registration keys, was different than .NET 1.1. What this resulted in, was registration keys generated with .NET 1.1 wouldn't work for .NET 2.0 and .NET 2.0 keys wouldn't work for .NET 1.1.

Live Demos and Training Available

Get your questions answered live over the Internet! Contact [Jared](#), or use our [Demo Request Form](#) or [Training Request Form](#) to schedule a **free** demo or training session today.

Kamp-Data wishes everyone a Merry Christmas and Happy New Year!

"The most wasted day of all is that during which we have not laughed."
